BACKG	GROUND:	
Spacing an	nd gaps in Terra Cotta were noticed as viewed from ground level on the South side of the Courthouse.	
Since the T	Terra Cotta is about 40' from ground level it was necessary to evaluate closer by use of a high lift. 016 a high lift was utilized to conduct an extensive review of the Terra Cotta on all sides of the building with pio	ctures being
taken for re	eference.	J. G. 190 2011.9
	s observed indicate severe deterioration as seen in photo images. al of mortor has fallen-out and is missing between the separate pieces of Terra Cotta including the top cap pie	ces. This
allows rain	water to penetrate the gaps. Rain water when frozen expands further speeding up the deterioration process l	by widening
	as and then allowing the water to make contact with the metal wires attached to structural beams that hold the is not possible to determine the condition of the retaining wires without removing each Terra Cotta piece. The	
	eces of Terra Cotta that are sagging on all four sides of the building causing concern.
