**SUMMARY**

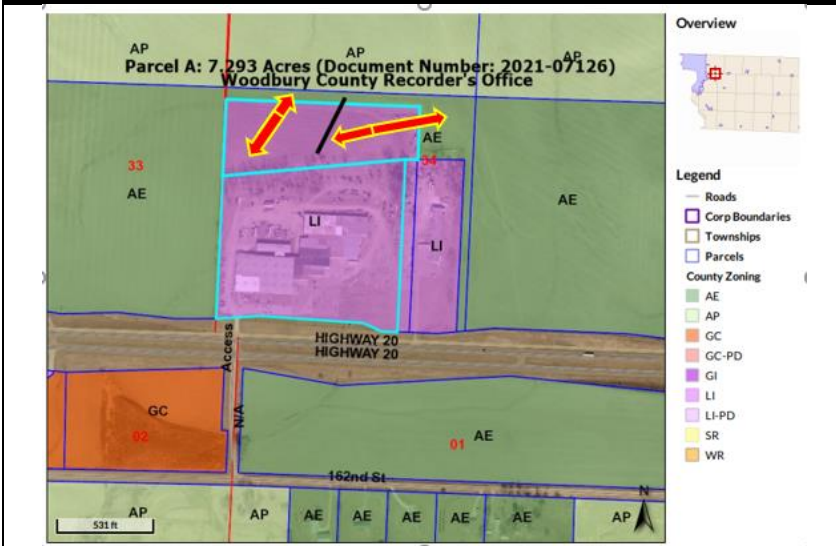

Flewelling Farms LC has filed an application for a zoning ordinance map amendment (rezone) on the property (Parcel #894634300004) as referenced above from the Limited Industrial (LI) to the Agricultural Estates (AE) Zoning District for the purpose of combining this 7.293-acre parcel with their abutting farm ground, 4.28-acres, which is identified as Parcel #894634300005. This proposal has been properly noticed in the Sioux City Journal Legals Section on September 11. The neighbors within 1000 FT have been duly notified via a September 10 letter about the September 27 Zoning Commission public hearing and have been requested to comment. As of September 28, no comments or inquiries have been received about the proposal. Appropriate stakeholders including government agencies, utilities, and organizations have been notified and have been requested to comment. No objections were received from the stakeholders. This property is not located in the floodplain. Based on the information received and the requirements set forth in the General Plan and Zoning Ordinance, this proposal meets the appropriate criteria for approval. It is the recommendation of the Zoning Commission and the staff to approve this proposal.

**ZONING COMMISSION AND STAFF RECOMMENDATION**

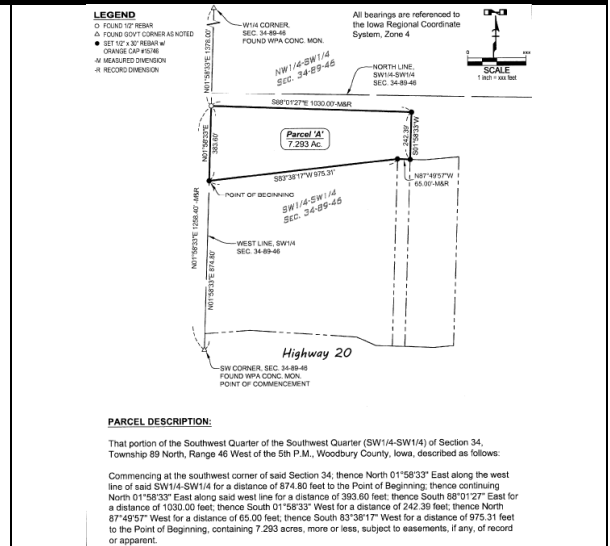

The Zoning Commission voted unanimously, 5-0, to recommend approval of this rezone proposal to the Board of Supervisors at their September 27, 2021 meeting following a public hearing.

Staff recommends approval of this rezone request as proposed.

A motion was made to recommend approval of the zoning ordinance map amendment from the Limited Industrial (LI) Zoning District to the Agricultural Estates (AE) Zoning District to the Board of Supervisors: O'Tool. Second: Parker. Vote 5-0.

#### Public Comment on Matters Not on the Agenda

None.

#### Staff Update

Director Gleiser offered a reminder about the Introduction to Planning and Zoning for Local Officials workshop that will be held on Wednesday, October 6 at Fireside Steakhouse in Anthon. Dinner will be provided at 6:00 PM and the training will begin at 6:30 PM. Reservations should be completed no later than October 4.

#### Commissioner Comment or Inquiry

Bride inquired about Iowa Department of Transportation's (IDOT) annexation of the borrow site just east of the US Highway 20/75 interchange. Gleiser indicated that the IDOT is conducting their grading work under a previous grading permit. No further information has been formally received from the city at this time.

Zellmer Zant inquired about a pipeline company that has been contacting area landowners about easements for a proposed pipeline. Gleiser stated that the Woodbury County Engineer, Mark Nahra, is working with the pipeline company (Midwest Carbon Express) on behalf of the county. Nahra and Priestley attended an Iowa Utilities Board informational meeting on September 16 that offered an overview of the pipeline proposal that was geared toward the property owners in the pipeline's path. The purpose of the pipeline is to capture carbon dioxide (CO2) emissions and transport them through the pipeline to North Dakota where they will be permanently stored underground in deep geologic storage locations. Priestley indicated that this is a multiyear project with various checkpoints including the pipeline companies' acquisition of easements.

Zellmer Zant inquired if companies have reached out to the county about solar energy. O'Tool indicated that he heard from a company about options on land he owns. Gleiser indicated that staff will be meeting with a renewables company representative on October 6 to discuss the county's regulations. He also indicated that the zoning ordinance is not designed for larger scale solar projects and could be reevaluated with public input to determine how we look at future solar projects including items of evaluation such as the Corn Suitability Rating (CSR). The MidAmerican solar site used a conditional use and was determined based on setbacks. Priestley indicated that residential and commercial solar energy fall under the conditional use permit. In the last couple years, a residential solar panel was approved as well as the MidAmerican solar project. Gleiser stated that Sioux City permits residential solar with a building permit. Bride suggested that in comparison with the appearance of metal roofs, solar panels might want to be considered as allowed uses.

#### Adjourn

Motion to adjourn: Meister. Second: Parker. Motion passed: 5-0. Meeting adjourned at 6:33 PM.

## EVALUATION CRITERIA

The Zoning Commission shall base their recommendations and the Board of Supervisors shall base their decision on any requested amendment of the zoning district map on the following criteria:

### Conformance with the goals and objectives set forth in the approved general development plan for Woodbury County including the future land use map.

The 2005 Future Land Use Map shows this area as General Commercial. The parcel is currently zoned Limited Industrial (LI) and the request is to change to Agricultural Estates (AE). The request conforms to the goals and objectives of the general development plan as it relates to the following land use goals:

- **Land Use Goal 1.2:** Adopted development regulations that promote efficient, stable land uses with minimum conflicts and provision of public infrastructure.
- **Agricultural Goal 3.1:** Promote agriculture as the main industry in the rural portion of the county.
- **Agricultural Goal 3.4:** Protect prime farm ground as determined by high corn suitability ratings (i.e. over 65 CSR) from conversion to other land uses. Discourage non-agricultural uses in prime farmland areas and other agricultural districts by providing residential lot size requirements and property separation distances between residential and agricultural uses.

### Compatibility and conformance with the policies and plans of other agencies with respect to the subject property.

There are no conflicts with the policies and plans of other agencies.

### Consideration of the Corn Suitability (CSR) of the property.

The CSR2 rating for this property includes ratings of 32, 91, 86, and 60. The agricultural goal of the Woodbury County General Plan is to protect prime farmland as determined by a high corn suitability rating (e.g. over 65 CSR) from conversion to other land uses. It is estimated that 68% of the said property has a CSR rating over 60.

Totals for Area of Interest			7.2	100.0%

USDA Natural Resources Conservation Service Web Soil Survey National Cooperative Soil Survey

### Compatibility with adjacent land uses.

The portion of this property being rezoned to AE is farm ground (Parcel A) and is compatible with the abutting farm ground to the west, north, and east. The intention is to combine this said 7.293-acre parcel with the 4.28-acre parcel (#894634300005) directly to the north and east through the Woodbury County Assessor. The property to the south is a truck and trailer sales business. The geography of the property makes this a natural fit to combine both farm areas.

### Compatibility with other physical and economic factors affecting or affected by the proposed rezoning.

This proposal is compatible with other physical and economic factors in the project area as there are no major infrastructure improvements required. This proposal combines farm ground.

**Any other relevant factors.**

The property owner purchased the said 7.293-acre parcel to add to their farming operation which has historically been farm ground. Typically, the acquisition of land from an abutting property would trigger a boundary adjustment under the subdivision ordinance. However, because there are two separate zoning districts, the boundary adjustment cannot be executed until the properties are zoned the same. Once, the same, the county assessor can complete the parcel combination under their guidelines.

### MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:12,000.

**Warning:** Soil Map may not be valid at this scale. Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service Web Soil Survey URL.  
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Woodbury County, Iowa  
Survey Area Date: Version 30, Jun 10, 2020  
Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Feb 1, 2014–Nov 25, 2016

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

### Description

This attribute is only applicable to soils in the state of Iowa. Corn suitability ratings (CSR2) provide a relative ranking of all soils mapped in the State of Iowa according to their potential for the intensive production of row crops. The CSR2 is an index that can be used to rate the potential yield of one soil against that of another over a period of time. Considered in the ratings are average weather conditions and frequency of use of the soil for row crops. Ratings range from 100 for soils that have no physical limitations, occur on minimal slopes, and can be continuously row cropped to as low as 5 for soils that are severely limited for the production of row crops.

When the soils are rated, the following assumptions are made: a) adequate management, b) natural weather conditions (no irrigation), c) artificial drainage where required, d) no frequent flooding on the lower lying soils, and e) no land leveling or terracing. The weighted CSR2 for a given field can be modified by the occurrence of sandy spots, local deposits, rock and gravel outcrops, field boundaries, and noncrossable drainageways. Even though predicted average yields will change with time, the CSR2 values are expected to remain relatively constant in relation to one another over time.

*Aggregation Method:* No Aggregation Necessary

Iowa Corn Suitability Rating CSR2 (IA)—Woodbury County, Iowa

Aggregation is the process by which a set of component attribute values is reduced to a single value that represents the map unit as a whole.

A map unit is typically composed of one or more "components". A component is either some type of soil or some nonsoil entity, e.g., rock outcrop. For the attribute being aggregated, the first step of the aggregation process is to derive one attribute value for each of a map unit's components. From this set of component attributes, the next step of the aggregation process derives a single value that represents the map unit as a whole. Once a single value for each map unit is derived, a thematic map for soil map units can be rendered. Aggregation must be done because, on any soil map, map units are delineated but components are not.

For each of a map unit's components, a corresponding percent composition is recorded. A percent composition of 60 indicates that the corresponding component typically makes up approximately 60% of the map unit. Percent composition is a critical factor in some, but not all, aggregation methods.

The majority of soil attributes are associated with a component of a map unit, and such an attribute has to be aggregated to the map unit level before a thematic map can be rendered. Map units, however, also have their own attributes. An attribute of a map unit does not have to be aggregated in order to render a corresponding thematic map. Therefore, the "aggregation method" for any attribute of a map unit is referred to as "No Aggregation Method".

**Tie-break Rule:** Higher

The tie-break rule indicates which value should be selected from a set of multiple candidate values, or which value should be selected in the event of a percent composition tie.
